DETAILED ACTION

Response to Amendment

1. The response filed May 26, 2006 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lemetyinen et al. (5,664,731) in view of Kettley et al. (4,867,870) and Wick (5,746,250).

Lemetyinen discloses a shower head spray device comprising: an elongated spray header 12; a drain opening 11; a valve 10. Lemetyinen discloses, in column 3, line 58, a rotation means to rotate shaft 13 but does not disclose a motor. Motors are well known in the art for imparting rotational motion. Kettley discloses an electric motor 28 and programmable logic controller 40 to rotate brush 26 in spray header 20. Applicant discloses, in his specification, on page 6, paragraph [0027], that a motor having a microprocessor is well known and available from Oden Control AB in Sweden. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have used the motor of Oden Control AB as the rotation means in the device of Lemetyinen as taught by Kettley for automation.

Additionally, Lemetyinen discloses neither a local controller nor a central operation controller. Wick teaches a plurality of motors 66, 68, 70 controlled by a

programmable controller 64. The programmable controller 64 has a local controller (the portion of controller 64 that produces a plurality of unique activation signals to control motors 66, 68, 70) and a central operation controller (the portion of controller 64 in which the user programs information). It would have been obvious to a person having ordinary skill in the art at the time of the invention to have used the controller of Wick to control the device of Lemetyinen for automation

Allowable Subject Matter

4. Claims 21 and 22 are allowed.

Response to Arguments

5. Applicant's arguments filed May 26, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
